Open to remote (US) roles and on-site roles near Lancaster, PA

SUMMARY

IT professional covering endpoint support, device management, and service operations in retail and healthcare. Supported POS and mobile device fleets across 1,000+ retail locations and a 15,000+ workstation Cerner-to-Epic transition at a major health system. About a year of fully remote experience supporting devices without physical access. Hands-on with Windows, Active Directory, Microsoft Intune, PowerShell, and ServiceNow incident and asset management. Targeting remote IT support and ServiceNow or IT asset management roles.

EXPERIENCE

Epic Deployment Technician, Penn State Health Hershey, PA | March 2026 to Present

- Part of the team supporting the Cerner-to-Epic transition across 15,000+ workstations at the main hospital and multiple outpatient sites, while personally working 20-30 PCs and laptops per shift, plus peripherals and printer troubleshooting.
- Deployed and integrated Ingenico 3600 payment terminals, barcode scanners, specimen label printers, and Intermec devices across multiple hospital and clinic departments ahead of a major Epic go-live.
- Re-imaged and provisioned enterprise laptops with Ivanti, standardizing BIOS settings and boot configurations to meet corporate security baselines.
- Maintained device records in Microsoft Intune: located computers in the system, removed primary users, and synced PCs to Intune.
- Ran PowerShell commands to pull Epic application icons onto workstation desktops, and used Command Prompt tools such as ping to troubleshoot network connectivity, with RDP for remote troubleshooting.
- Audited and moved thousands of assets (POS terminals, iOS devices) from "In Stock" to "In Use" in ServiceNow, mapping cost centers, host names, and managers, and adding new equipment and updating asset locations after install to keep records accurate.
- Used local administrator elevation to install layered application packages and device drivers across varied workstation environments.
- Tracked hostnames and asset tags in master sheets to set baseline configurations for Testing/Dress Rehearsal (TDR) validation.
- Acted as primary technical contact for clinical department managers, minimizing downtime during hardware work and cross-department site deployments.

IT Deployment Analyst, Foot Locker Remote (Camp Hill, PA) | April 2025 to February 2026

- Supported the POS terminal upgrade from v19 to v23 across 1,000+ retail locations using PowerShell and VMware vSphere, reducing operational downtime by 20%.
- Ran version-check commands remotely against North American and European store systems to track which devices were still on v19 and which had upgraded to v23.
- Ran PowerShell scripts to update devices and validated software deployments and patches through system testing, delivering 99% error-free rollouts.
- Configured and provisioned handheld scanners, tablets, and iPads with SOTI MobiControl for stores and distribution centers, improving device readiness.
- Worked with IT teams, field technicians, and vendors to validate installs and system health, reducing post-deployment issues.
- Handled roughly 200 incident tickets a year in ServiceNow and Jira while supporting the system upgrade project, and documented troubleshooting procedures.

PROJECTS

- **Windows and Active Directory lab:** Built two Oracle VirtualBox instances running Windows 11 and practiced Active Directory administration: created 3 test users with role-specific permissions, reset passwords, and removed an account to simulate offboarding.
- **Personal AI assistant and HUD:** Building a voice-controlled AI assistant with a custom web HUD in Python (Flask, SocketIO) and JavaScript (Three.js), using the Claude Haiku API after moving off local Ollama. Features world clocks and weather, an interactive globe with news by country, live sports scores from ESPN APIs with a ticker, PC temperature monitoring, and an animated 3D avatar.
- **Portfolio website:** Built and published a personal portfolio site at kristianpadilla.github.io.

TECHNICAL SKILLS

Endpoint management and support: Windows 10/11, iOS, device imaging and provisioning (Ivanti), BIOS and boot configuration, software packaging and deployment, patch management, Microsoft Intune, mobile device management (SOTI MobiControl), POS and peripheral deployment (Ingenico, barcode scanners, label printers, Intermec)

Identity and systems: Active Directory, Group Policy, Microsoft 365, Windows Server, VMware vSphere, DNS, TCP/IP, LAN

ITSM and collaboration: ServiceNow, Jira, SharePoint, Microsoft Teams, remote support (RDP, TeamViewer with 7+ years of use)

Scripting and data: PowerShell, Command Prompt (network diagnostics), Python (Flask), SQL, JavaScript, HTML, REST API integration

Cloud: Google Workspace

EDUCATION AND CERTIFICATIONS

Foundations of Cybersecurity (Google, via Coursera), August 2024

Computer Software and Information Systems (Certificate), Thaddeus Stevens College of Technology, completed June 2023

High School Diploma, Donegal High School, Mount Joy, PA, 2015
